A: C:\Users\(userName)\AppData\Local\New folder created by the installer. This includes registry information, which could be a cause of the errors. or does the DBMS actually run from this folder? If it's installed to Program Files, you can try to move the folder or rename it to ensure no relevant registry keys remain. If you installed the crack-versions into Program Files, you should move them to a folder of your choice and remove the cracked and cracked.exe-files from this folder. Posted by: mnefelfs on May 14, 2007 12:19 PM The problem with all "reality" films is that they are quickly outdated as all the technology - and methods of assassination, violence, etc. - are updated. Posted by: Mike Stark on May 14, 2007 12:50 PM As far as I know, currently, we have no idea which assassin is going to kill (or succeed in killing) any given American president. That changes almost daily, as it has since Eisenhower. Posted by: B. D. on May 14, 2007 2:05 PM I would really like to know what the odds are. If it's a long shot then we should do all we can to ensure the safety of our current President and POTUS. If it's a short shot then, well, we really need to have a new POTUS in office when Clinton or Bush leave. Posted by: A. M. on May 14, 2007 2:35 PM If they dont want to be assassinated it shouldnt make any difference what the odds are they are cheating by taking power in the first place. Posted by: Mike Stark on May 14, 2007 2:59 PM What if they are running to prevent assassination? Posted by: James F. Sklansky on May 14, 2007 3:12 PM Exactly. The moment the die is cast, you abandon all hope. Posted by: misterpl on May 14, 2007 4:31 PM A very good point. Who knows what they are doing to try to thwart being killed. Some men have spent years plotting and planning how to kill the President of the United States but it never ends well. But this is just conjecture on my part. Posted by: Homer on May 14, 2007 5:34 PM To some extent we don't f678ea9f9e
